

## **SPRING BREAK-UP LOAD LIMIT GUIDELINES**

In order to better serve the citizens and businesses of the Post Falls Highway District during spring break-up, while load limits are in place, permits will be issued for the following reasons:

### **BLANKET PERMITS**

1. Concrete and gravel companies are issued blanket permits under which they can haul 3 yards of concrete and 5 yards of sand or gravel. Companies falling under this reason will be required to fill out a permit for each truck they will be running for the season.
2. Garbage trucks, septic system pump trucks, heating oil and propane trucks can haul ½ loads. These are considered essential services. Companies falling under this reason will be required to fill out a permit for each truck they will be running for the season.

### **SPECIAL PERMITS**

For the following special permits complete the Spring Break-up Hauling Application located on our web page under Forms|Applications and submit to the District office:

1. Utility companies
2. Transport companies

To determine if your gross vehicle weight complies with Kootenai County Load Limits click the General Info tab then click Load Limits to calculate your vehicle's gross weight.

**EVERYONE HAULING A LOAD MUST COMPLY WITH THE 25 MPH SPEED LIMIT.**

The District will process permit applications as quickly as possible but expect up to 48 hours for your approved application to be processed.
